

1      **Amendment to the Claims**

2      **In the Claims:**

3            Please amend Claims 1, 8, 13, and 22 as set forth below.

4      1. (Currently Amended) A method for reformatting a previously formatted portion of  
5      document text comprising the steps of:

6            determining a sample of formats comprising a plurality of formats from a format set, the  
7      format set including a plurality of at least one of font sets and color sets;

8            identifying the portion of text within the document to be reformatted; and

9            for each format included in the sample of formats, reformatting the portion of text with the  
10     format and simultaneously displaying the reformatted portion of text reformatted in each of the  
11     formats in the sample of formats in a live preview window such that the user is able to visually  
12     compare how the portion of text will appear in each of the formats.

13     2. (Previously Presented) A computer readable medium having stored thereon computer  
14     executable instructions for performing the steps of claim 1.

15     3. (Previously Presented) The method of claim 1, further comprising the steps of determining  
16     the format set based on user selection of a color set and a font set.

17     4. (Original) The method of claim 3, wherein the color set comprises a plurality of colors  
18     defining a color scheme, the colors being pre-selected by a trained designer.

19     5. (Original) The method of claim 3, wherein the font set comprises a plurality of fonts  
20     defining a font theme, each font having a font name and a font size, the fonts being pre-selected by a  
21     trained designer.

22     6. (Original) The method of claim 1, wherein each format comprises a format font name, a  
23     format font color and a format font size.

24     7. (Original) The method of claim 1, wherein the live preview window comprises a floating  
25     window that hovers above the document.

26     8. (Currently Amended) The method of claim 1, further comprising the steps of:

27            receiving a command for adding a custom format to the sample of formats;

28            in response to the command, adding the custom format to the sample of formats; and

29            reformatting the portion of text with the custom format; and

30            displaying the reformatted portion of text in the live preview window.

1           9. (Original) The method of claim 8, wherein the custom format comprises a user-defined  
2 format.

3           10. (Previously Presented) A computer readable medium having stored thereon computer  
4 executable instructions for performing the steps of claim 8.

5           11. (Previously Presented) The method of claim 1, wherein the step of identifying the  
6 portion of text within the document to be reformatted comprises the step of identifying the portion of  
7 text positioned immediately adjacent to a cursor.

8           12. (Previously Presented) The method of claim 1, wherein the step of identifying the  
9 portion of text within the document to be reformatted comprises the step of identifying the portion of  
10 text that has been highlighted by a user.

11          13. (Currently Amended) A system for reformatting a previously formatted portion of  
12 document text comprising:

13           a display device for displaying the previously formatted portion of document text and a user  
14 interface for selection of a selected color set and a selected font set;

15           a memory for storing a plurality of color sets and a plurality of font sets;

16           an input device for generating commands corresponding to selection of the selected color set  
17 from the plurality of color sets and the selected font set from the plurality of font sets;

18           a processor in communication with the display device, the memory, and the input device for  
19 receiving the commands and determining a format set based on the selected color set and the selected  
20 font set; and

21           the processor being further operable for:

22           determining a sample of formats comprising a plurality of formats from the format set,  
23 the format set including a plurality of at least one of font sets and color sets,

24           identifying the previously formatted portion of text within the document to be  
25 reformatted, and

26           for each format included in the sample of formats, reformatting the previously  
27 reformatted portion of text with the format and simultaneously displaying the reformatted portion of  
28 text reformatted in each of the formats in the sample of formats such that the user is able to preview  
29 how the portion of text will appear in each of the formats in a live preview window without applying  
30 any of the formats to the portion of text.

1           14. (Original) The system of claim 13, wherein each format comprises a font name, a font  
2 color and a font size.

3           15. (Original) The system of 13, wherein the color set comprises a plurality of colors  
4 defining a color scheme, the colors being pre-selected by a trained designer.

5           16. (Original) The system of claim 13, wherein the font set comprises a plurality of fonts  
6 defining a font theme, each font having a font name and a font size, the fonts being pre-selected by a  
7 trained designer.

8           17. (Original) The system of claim 13, wherein the live preview window comprises a  
9 floating window that hovers above the document.

10          18. (Original) The system of claim 13, wherein the input device generates a further  
11 command for adding a custom format to the sample of formats; and

12           wherein the processor is further operable for:

13           in response to the command, adding the custom format to the sample of formats, and  
14           reformatting the portion of text with the custom format and displaying the reformatted  
15 portion of text in the live preview window.

16          19. (Original) The system of claim 18, wherein the custom format comprises a user defined  
17 format.

18          20. (Original) The system of claim 13, wherein identifying the portion of text within the  
19 document to be reformatted comprises identifying the portion of text positioned immediately adjacent  
20 to a cursor.

21          21. (Original) The system of claim 13, wherein identifying the portion of text within the  
22 document to be reformatted comprises identifying the portion of text that has been highlighted by a user.

23          22. (Currently Amended) A user interface for reformatting a previously formatted portion of  
24 document text comprising:

25           a first control for selection of a color set;

26           a second control for selection of a font set; and

27           a live preview window for simultaneously displaying a plurality of live preview text samples,  
28 each of the live preview text samples including at least a section of the previously formatted  
29 document text and presenting the section of the previously formatted document text in one of a  
30 plurality of formatted according to a format sets, at least one of the plurality of format sets being

1 defined by the selected color set and the selected font set, the format set comprising a plurality of  
2 formats, each of the live preview text samples being displayed with one of the formats.

3 23. (Original) The user interface of claim 22, further comprising a third control for adding  
4 a custom format to the sample of formats; and

5 wherein the live preview window further displays one of the live preview text sample with  
6 the custom format.
